

The Nutrition Embedding Evaluation Programme (NEEP) presents
“Impact Evaluation of BRAC’s Nutrition and Early
Childhood Development Program”

Photo: BRAC

Please join us in welcoming Dr. Thomas de Hoop of American Institutes for Research (AIR) as he gives an informal presentation of BRAC’s NEEP-funded evaluation, “Impact Evaluation of BRAC’s Nutrition and Early Childhood Development Program.” The goal of BRAC’s nutrition program is to reduce malnutrition, mortality, and morbidity among young children and pregnant and lactating women in poor and socially excluded populations. In some areas, the nutrition intervention is complemented by a comprehensive early childhood development (ECD) intervention to improve knowledge of caregivers on how to stimulate the cognitive and physical development of children. BRAC’s research partner, AIR, has developed a mixed-methods research design that uses a combination of experimental, quasi-experimental, and qualitative methods to assess the effects of BRAC’s nutrition and ECD programs.

Monday, 22 February 2016 | 1:00pm—2:00pm

PATH DC Office

455 Massachusetts Avenue NW Suite 1000 Room 1065

Kindly RSVP by Thursday, 18 February to Brianna Musselman at bmusselman@path.org.

Please send any questions or concerns to Brianna Musselman at bmusselman@path.org.
